Summary

Data Science undergraduate (9.04 CGPA) and Oracle Certified GenAI Professional with strong expertise in **Generative AI pipelines, Machine Learning, and Model Optimization**. Hands-on experience in **RLHF and AI model evaluation** through freelance work at Outlier.ai. Proven ability to build multi-modal systems (Text-to-Image, Audio Processing) and optimize inference latency. Seeking to leverage deep technical skills in AI alignment and evaluation at Deccan AI.

Education

BCA Hons. in Data Science

Jagran Lakecity University, Bhopal, Madhya Pradesh

Graduation: 2026

CGPA: 9.04 / 10

Skills

Generative AI: LLMs (Llama, GPT), Stable Diffusion, RAG Pipelines, Vector Databases, Prompt Engineering

AI Evaluation: RLHF (Reinforcement Learning from Human Feedback), Model Ranking, Fact-Checking & Alignment

Technical Stack: Python, SQL, TensorFlow, PyTorch, Pandas, Scikit-learn, XGBoost

Data Visualization: Advanced Excel, Power BI, Tableau, Matplotlib

Experience

Outlier.ai | AI Trainer & RLHF Contributor (Freelance)

April 2025

Remote

Focus: RLHF, Code Generation Evaluation

- Contributed to the fine-tuning of Large Language Models (LLMs) by evaluating and ranking model outputs based on reasoning, factual accuracy, and code correctness (RLHF).
- Reviewed multi-turn conversations to identify hallucinations and improve model alignment with user intent.
- Selected to work on high-priority code generation tasks following performance in a global hackathon.

JPMorgan Chase & Co. Quantitative Research (Virtual Internship)

Nov 2025

Data Analytics (Remote)

Tools: Python, StatsModels

- Analyzed large-scale loan datasets to estimate default probability using dynamic programming.
- Engineered categorical features from credit scores to enhance predictive accuracy and model robustness.

Projects

CONTRA - AI-Driven Data-to-Art Platform | Python, Stable Diffusion, LLaMA

- Developed a multi-modal AI platform transforming text into contextual narratives and visuals.
- Engineered APIs integrating LLaMA and Stable Diffusion for narrative and image generation.
- Built pipelines integrating Wikipedia and GNews APIs for real-time fact-checking and enrichment.

ORBITUNE - AI-Powered 16D Music Experience | Python, DSP, Audio Processing

- Engineered an AI system converting stereo tracks into immersive 16D audio using DSP and ML algorithms.
- Implemented audio feature extraction (Librosa) to analyze and transform multi-modal signal data.

Smart Product Pricing Engine | Python, XGBoost, Model Optimization

- Optimized SMAPE metric under hardware limits (RTX 4050) through feature-training decoupling.
- Achieved sub-30% SMAPE score, demonstrating ability to optimize models for performance constraints.

Awards & Certifications

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Global Hackathon Finalist (Outlier.ai): Recognized for excellence in AI model evaluation.
- Achievement of Academic Excellence Award (100% scholarship)
- Led operations for 2 annual hackathons (400+ attendees), achieving 100% logistical success.
