Summary

High-achieving Data Science undergraduate (9.04 CGPA) with specialized expertise in **AI Model Optimization, Cloud Infrastructure, Data-Analysis and intelligent insight generation from data**. Proven track record of developing low-latency predictive systems (less than 1ms) and secure data pipelines. Seeking to leverage technical skills in large-scale data processing and algorithmic efficiency to contribute to the **Unique Identification Authority of India (UIDAI)** technology initiatives and Digital Public Infrastructure (DPI).

Education

BCA Hons. in Data Science

Jagran Lakecity University, Bhopal, Madhya Pradesh

Graduation in: 2026

CGPA: 9.04 / 10

Skills

Programming & Querying: SQL, Python

Data Visualization Tools: Advanced MS Excel, Power BI, Tableau

Analytical Abilities: Data Cleaning, Exploratory Data Analysis (EDA), Insight Generation, Descriptive Statistics

ML and AI: Machine Learning, Deep Learning, Generative AI, AI Automation, Model Evaluation, Feature Engineering

Experience

Deloitte Australia Data Analytics Job Simulation on Forage

Job Simulation (Remote)

Nov 2025

Tools Used: Tableau, Excel

- Developed interactive dashboards in Tableau to visualize forensic data patterns, aiding in the identification of data inconsistencies and potential irregularities.
- Conducted root-cause analysis on complex datasets to drive evidence-based decision-making for risk mitigation.

JPMorgan Chase & Co. Quantitative Research (Virtual Internship)

Data Analytics (Remote)

Nov 2025

Tools Used: Python, Matplotlib, scikit-learn, StatsModels

- Analyzed large-scale loan datasets to estimate **default probability**, employing dynamic programming techniques relevant to identifying financial fraud and anomalies.
- Engineered categorical features from credit scores to enhance predictive accuracy, demonstrating capability in handling sensitive user data profiles safely.

Projects

CONTRA - AI-Driven Data-to-Art and Storytelling Platform | *Python, TensorFlow, Stable Diffusion, LLaMA*

- Developed an AI platform that transforms text into contextual narratives, visuals, and chatbot interactions.
- Engineered APIs integrating LLaMA and Stable Diffusion for narrative and image generation.
- Built data pipelines combining Wikipedia, DBpedia, and GNews for real-time contextual enrichment.

ORBITUNE - AI-Powered 16D Music Experience | *Python, Librosa, Demucs, FFmpeg, Gemini API*

- Created an AI system converting stereo tracks into immersive 16D audio using DSP and ML.
- Integrated an emotion-aware chatbot for mood detection and personalized music recommendations.

Smart Product Pricing Regression Challenge | *Python, XGBoost, CLIP, DeBERTa-v3*

- Built a multimodal regression pipeline fusing image, text, and numerical features for optimal pricing.
- Optimized SMAPE metric under hardware limits (RTX 4050, 6GB VRAM) through feature-training decoupling.
- Achieved sub-30% SMAPE score with a stable and high-performing XGBoost model.

Awards & Certifications

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- CodeWithHarry's The Ultimate Job Ready Data Science Course
- Achievement of Academic Excellence Award (100% scholarship)
- Led operations for 2 annual hackathons (400+ attendees), achieving 100% logistical success.
